**How SECURE THE FUTURE Programs Touch Lives**

**BUILDING COMPREHENSIVE CARE MODELS**

- Community mobilization to fight HIV/AIDS
- Voluntary counseling and testing
- Food security and nutrition programs
- Support for women caring for children and grandchildren
- In-school HIV/AIDS prevention programs
- Training for traditional healers, birth attendants and community leaders
- Volunteer support groups
- Support programs for orphans and other vulnerable children
- Beadwork and other income-generating projects
- Research that produced fast and effective diagnostics
- Human Resource capacity development through curriculum development and training
- Clinical research programs in opportunistic infections, self-care, nutrition, ARV medicines, and other categories
- Continuous prevention
- Patient observance groups to fight stigma and improve treatment
- Tracking vulnerable populations

**SECURE THE FUTURE®** evolved and remained agile over the years in order to play as relevant a role as possible in the global response to HIV/AIDS. From 1999 to 2002, the program was focused on broad-based grantmaking to support medical research and community outreach and education. From 2003 to 2007, focused investments were made in community-based HIV/AIDS care and treatment support, NGO training, and pediatric AIDS.

In 2008 SECURE THE FUTURE entered its third phase as a Technical Assistance and skills transfer program. This phase will capitalize on the program’s funding, program management experience and expertise, and track record as a committed private public partnership program. The aim is to replicate SECURE THE FUTURE’s investments and expertise, and track record as a committed private public partnership program. The aim is to replicate SECURE THE FUTURE’s and expertise, and track record as a committed private public partnership program. The aim is to replicate SECURE THE FUTURE’s investments and expertise, and track record as a committed private public partnership program.

---

**SECURE THE FUTURE**

**KEY PROGRAMS IN 14 COUNTRIES**

**Three focus areas:**

- Children living with HIV/AIDS
- Community-based programs supporting medical care and treatment
- NGO Training Institute

---

**Phases and Major Milestones**

- Phase 1 - Broad-based grantmaking (1999-2002)
- Phase 2 - Broad-based grantmaking (2002-2006)
- Phase 3 - Technical assistance and skills transfer (2007-2010)

---

**Technical Assistance and Skills Transfer Program**

SECURE THE FUTURE is providing seed funding and together with its implementing partners has formed a faculty to provide technical assistance to governments, non-governmental organizations, and the private sector to scale up HIV/AIDS care and support in Africa.

---

**Community-Based Treatment Support Program**

Six pilot centers show that comprehensive medical treatment and care, including access to antiretroviral medicines, combined with broad-based community support can be successful in fighting HIV/AIDS in remote, poverty-striken areas where resources are extremely limited.

---

**Children’s HIV/AIDS Clinical Centers of Excellence**

SECURE THE FUTURE and Baylor College of Medicine opened the first clinical center in Africa focused on children with HIV/AIDS, located in Botswana. Additional Children’s Clinical Centers of Excellence have opened in Lesotho, Swaziland and Uganda, with two more to be built in Burkina Faso and Tanzania.

---

**Pediatric AIDS Corps**

SECURE THE FUTURE and Baylor College of Medicine have created the Pediatric AIDS Corps to send 50 doctors a year over five years to Africa to treat approximately 100,000 children and train local health care professionals.

---

**PEDIATRIC AIDS CORPS**

**CHILDREN’S CLINICAL CENTERS OF EXCELLENCE**

**COMMUNITY-BASED TREATMENT SUPPORT PROGRAM**

**TECHNICAL ASSISTANCE PROGRAM**

**60 GRANTS TO HELP MAINTAIN LOW PREVALENCE OF HIV/AIDS IN 4 COUNTRIES IN WEST AFRICA**

These innovative grants target specific groups vulnerable to HIV infection (commercial sex workers, mobile populations, ambulatory vendors, households, prisoners and MSM); leverage railroad lines and transport lanes to deliver education and care; leverage traditional communicators in education and care efforts; and drive prevention through care and support for PWHA.
