

Mr. Abdul-Rauf SAYED

Abdul-Rauf is a senior biostatistician (MSc Statistics) in the School of Public Health and Family Medicine, University of Cape Town (UCT). He is involved in a number of collaborative research projects and provides statistical support and consultation for the development and implementation of programs and policies in public health. He also lectures to post graduate and under graduate students in the faculty of health sciences of UCT.

He is competent in data management and analysis for publications. Statistical analysis of morbidity and mortality surveillance; and the efficacy of antiretroviral therapy is also one his areas of competence.

Rauf's mainly co-authored writings have been published in medical journals. The topics he has covered range from breast cancer, folic acid awareness among women to birth defects, among others.

A member of a number of health and statistics associations, Rauf brings a wealth of experience on statistical analysis to the STFTAP.
